SUMMARY

Experienced R&D leader, hacking my way through software systems since age 8. My current religions - javascript (not python), vim (not emacs) and spaces (not tabs), though these have changed multiple times over the past 30 years. Building software is great, building an excellent R&D organization that builds great software is even better. Currently interested in AI, humans, and how to best mix the two.

PROFESSIONAL EXPERIENCE

Aleph *EIR* **2020 - Present**
Aleph is a leading Israeli early stage VC

Heat Intelligence *Co-Founder and CTO* **2016 - 2020**
Cloud service for intelligence on demand, providing cognitive services in real time by a hybrid cloud of humans and AI. Bootstrapped to ~\$1m ARR. Service is stil live.

Intucell (acquired by Cisco) *R&D Group Manager* **2011 - 2016**
Led a group (~40 engineers) developing a highly scalable, fault tolerant system for cellular networks radio optimization (on-prem cluster of ~200 servers, pre-kubernetes)

XIV (acquired by IBM) *Software Developer* **2009 - 2011**

Klapka.co.il *Co-Founder* **2008 - 2009**
Localized version of Threadless.com, nice side-project

IDF (8200) *Information Security Research* **2001 - 2009**
Various infosec roles ranging from mathematical research through HPC, to low-level / embedded systems security research

EDUCATION

Hebrew University, Jerusalem, Israel **2005 - 2008**
B.Sc., Mathematics

“Haman Talpiot - Aham” Course, IDF **2000 - 2001**

Galili High School, Kfar-Saba, Israel **1997 - 2000**
